

Navigation panel

The Navigation panel sets the appearance and orientation of a Navigation widget

Navigation panel

Use the **Pages menu** (1) to choose which group of pages this navigation bar applies to. This is only active if you have more than one folder of pages.

Use the **orientation buttons** (2) to choose between vertical and horizontal navigation.

The **alignment buttons** (3) set left, centre or right alignment.

The **Reset button** (4) returns all the settings to their default state.

Colour and Background for the whole navigation widget can be set with the **Colour buttons** (5). To set the colour and background for each state click the **Styles** menu (7).

Set padding and spacing for the navigation items using the sliders (6).
